

CITY OF LARKSPUR
**Bon Air Bridge
Replacement Project**

May 11, 2018

**PUBLIC NOTICE OF CONSTRUCTION
AND CONSTRUCTION PHASE 1A INFORMATION**

(Please do not discard)

More information is available on the project website at www.bonairbridge.com.

You may direct any questions to 415-524-4500 or info@bonairbridge.com

Bon Air Bridge construction activities are scheduled to begin on Bon Air Road between Magnolia Avenue and the west end of the existing bridge on **May 23, 2018**.

This is a large scale, long duration project that will have impacts to the surrounding area including but not limited to **TRAFFIC DELAYS**. We appreciate your patience and cooperation following all onsite construction signage.

Key components of the bridge support system are deteriorating, and the bridge qualified for replacement under the federally funded Highway Bridge Program. In March of 2018, after a public bidding process, The City Council awarded a construction contract to the low bidder, Golden State Bridge from Benicia CA. The project is anticipated to take four years to complete. This notice details the conditions for the first phase of work, Phase 1A. A separate notice will be provided prior to Phase 1B work.

Construction activities in the first phase (PHASE 1A) will include:

1. Installing construction area signs
2. Installing temporary traffic control measures and barriers
3. Removal of the Bon Air Road median island to accommodate temporary paving for future phases of work.
4. Work at the southbound Magnolia bus pad and one southbound traffic lane, just north of Bon Air Road.
5. Excavations at the future storm drain pump station on the north side of Bon Air Road, just west of the bridge.
6. Wildlife exclusion fencing, storm water filtration and other environmental measures will be installed, as needed, throughout the work area.

All sidewalks on Bon Air Road and one vehicle lane in each direction on each side of the median will remain open during Phase 1A construction work. **ALL ACCESS TO BUSINESSES WILL REMAIN UNCHANGED DURING THIS PHASE 1A OF CONSTRUCTION.**

The Contractor anticipates Phase 1A of work to last approximately 4 weeks. The sketch on the back of this notice shows the proposed work areas for phase 1A.
