CONSTRUCTION PHASE 1B INFORMATION**

(Please do not discard)

***More information is available on the project website at www.bonairbridge.com.
You may direct any questions to 415-524-4500 or info@bonairbridge.com***

Bon Air Bridge construction is scheduled to enter Phase 1B work by **July 1, 2018**. Phase 1B work includes expanding the construction area on Bon Air Road from Magnolia Avenue to Bayview Road including shifting traffic to the south side of Bon Air Road to accommodate construction on the north side.

Construction activities/ impacts in Phase 1B will include:

1. Shifting all Bon Air Road traffic to the south side of Bon Air Road – a concrete barrier will be installed separating the travel lanes from the work on the north side of the bridge.
2. Closing the north side bridge sidewalk – all pedestrian traffic will be detoured to the south side bridge sidewalk.
3. Closing the right turn slip lanes (free right turns) at the Bon Air Road/ Magnolia intersection. All northbound Magnolia traffic will be contained in one combined through-right lane. All westbound Bon Air Road traffic will be contained in one combined left-right turn lane. New signal timing will be in place for the new configuration.
4. At the South Eliseo intersection, all westbound Bon Air Road traffic will be contained in one combined through-right turn lane. New signal timing will be in place for the new configuration.
5. Note that the new signal timings may result in increased wait times during off-peak hours due to the removal of vehicle detection loops.
6. All crosswalks at Bon Air Road/ Magnolia Avenue will be closed. Pedestrians will be detoured to the crosswalk at the medical buildings driveway, just west of the bridge.
7. The west (bridge side) Bon Air Road crosswalk at South Eliseo Drive will be closed. The east (hospital side) crosswalk will remain open.
8. Construction activities will include installation of the storm drain pump station, north side bridge demolition, installation of north side trestle and north side piers for the new bridge.
9. Environmental protection measures will continue.

One vehicle lane in each direction will remain open during Phase 1A construction work. **ALL ACCESS TO BUSINESSES WILL REMAIN UNCHANGED DURING THIS PHASE OF CONSTRUCTION.**

This is a large scale, long duration project that will have impacts to the surrounding area including but not limited to **TRAFFIC DELAYS**. We appreciate your patience and cooperation following all onsite construction signage. The Contractor anticipates Phase 1B of work to last approximately 1 year, although some of the described closures and impacts will have a shorter duration. The sketch on the back of this notice shows the proposed work areas for phase 1B.
