PUBLIC NOTICE OF CONSTRUCTION

JUNE – AUGUST 2020: STAGE 2 WORK CONTINUES

Aerial View of Current Bon Air Bridge Construction Activities and Project Progress

The Bon Air Bridge Project Team is pleased to announce that the removal of the old bridge superstructure that was above the creek has recently been completed. Stage 2 bridge work will begin again on June 15th (when in-water work restrictions are lifted) and continue for the next several months. The bridge contractor will be focused on removing the old bridge piling and abutments, installing sheet-pile cofferdams (enclosures for dewatering the work area) and constructing the foundation piling for the new bridge.

Special precautionary measures are in place to protect Corte Madera Creek at all times, including equipment for the containment and handling of concrete debris. We understand that concrete demolition and pile driving activities are loud and the City's noise and work hours ordinances will be strictly enforced. Please use caution when traveling through the work area and expect periodic lane closures, to allow construction equipment to safely enter and exit the work zone. We appreciate your patience and cooperation as we continue to make these important improvements.

**Please note that all dates are estimated and subject to change.*
