## PUBLIC NOTICE OF CONSTRUCTION

SEPTEMBER – NOVEMBER 2020: STAGE 2 WORK CONTINUES

### *Aerial Views of Bon Air Bridge Stage 2 Construction and Project Progress*

The Bon Air Bridge Project now moves into its next phase, to construct the Stage 2 bridge pier foundations. Since mid-June (when in-water work restrictions were lifted), our bridge contractor was focused on removing the old bridge foundations and installing temporary sheet-pile cofferdams. Cofferdams provide an enclosed work area to construct the new bridge foundation piling that are 8-feet in diameter and extend 100-feet below the creek bed. Special precautionary measures are in place for construction debris containment and handling to protect Corte Madera Creek at all times.

We understand that construction activities are loud, and the City's noise and work hours ordinances will be enforced. Additionally, please use caution when traveling through the work area and expect periodic lane closures to allow construction equipment to safely enter and exit the work zone. We appreciate your patience and cooperation as we continue to make these important improvements.

*\*Please note that all dates are estimated and subject to change.*

**Next Steps:** Check the project website at [www.bonairbridge.com](http://www.bonairbridge.com) for updates on construction activities and project milestones.
